

LMS Technologies, Inc.

CERTIFICATE OF HEPA PERFORMANCE

Under contract with Milwaukee tools Inc., LMS Technologies tested HEPA-VAC unit Model number 8960-20 with Fleece Bag Model number 49-90-1955, Main Filter Model number 49-90-1953 and HEPA Filter Model number 49-90-1952 for HEPA Performance.

To qualify as a HEPA system, a unit must capture and retain 99.97% of all contaminants down to 0.3 microns in particle size. The Milwaukee stand-alone unit showed an efficiency of 99.998% in the <0.3 micron particle size range and larger which qualifies as a HEPA system. The efficiency was confirmed by testing the system based on British Standard 3928r14 using Sodium Flame Photometer and data matched the particle counters data.
